

Brainstorming & Idea Prioritization Template

Date	01 JUNE 2026
Team ID	XXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Oleti Ashritha	Develop a Machine Learning model to predict whether a credit card application should be approved or rejected based on applicant details and credit history.	Machine Learning	
2	Gnana Sathwick	Build a user-friendly Flask web application for entering applicant details and displaying approval predictions instantly.	Web Application	
3	Hemanth Kumar	Perform Exploratory Data Analysis (EDA), feature engineering, and compare multiple ML algorithms to improve prediction accuracy.	Model Evaluation	
4	Pavani Jetti	Design a responsive frontend using HTML, CSS, and Bootstrap with proper form validation and result visualization.	Data Visualization	

Brainstorming & Idea Prioritization Template

5	Nandhyala Dasthagiri	Deploy the trained model on the cloud (Render/IBM Watson) and maintain project documentation and GitHub repository.	Deployment & Cloud	

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Build an ML-based Credit Card Approval Prediction System with multiple algorithms and select the best-performing model.				
2	Develop a Flask web				
3	Create an analytics dashboard for model insights and performance visualization.
